

DRAFT

Birkdale Streetlight District Meeting

Came to order at 8:40 am April 21,2010.

Present was committee members Clifford J. Riley , William T. Marron & Jack Schneider,& MSTBU coordinator Donna DeBerry.

Donna went over budget worksheet for this years projected budget. Our inventory to date for our lighting district is 36 lights which allowed for one more light if needed in next years budget. Donna informed us at the meeting that a resident on Burnham Court , expressed an interest in having a light added between the address's of 5610 & 5612 Burnham Court in this years budget. We came to a decision for our committee members to meet tonight and evaluate the request, the question of weather a pole was needed came up so we added it to the budget if needed. We will inform Donna as to weather it is in fact needed , or to remove the pole from the budget or weather or not we feel the light is needed at all. Mr Willam Marron has been approached from multiple home owners as to the feasibility of having lights added to the entire Lochmoor subdivision which branches off of Birkdale Ave. Donna requested a map of the effective area be supplied to her and the location and number of lights , also we decided to perform a survey of the residents affected in this area as to weather they are in favor of the proposal or not . This plan is going to be implemented over a period of years to complete if it is agreed upon.

Meeting was adjourned at 9:35 am . Clifford J Riley
